FLORIDA POPULATION:
A SUMMARY OF 1980 CENSUS RESULTS

April 1, 1980

State, Counties, and Municipalities

prepared by the

POPULATION PROGRAM
BUREAU OF ECONOMIC AND BUSINESS RESEARCH
UNIVERSITY OF FLORIDA

May, 1981

This public document was promulgated at an annual cost of $153.00 or $.08 per copy to make available 1980 Census numbers for Florida. The sale price of this publication is set to cover the total cost of producing it. The "annual cost" to the Bureau shown in this box is only that part of the cost paid out of state funds.

Table 10.—Population of Florida counties by race and Spanish origin: April 1, 1980 44

Table 11.—Population of the United States by region and state, April 1, 1980 and April 1, 1970 46

INTRODUCTION

The numbers published in this booklet are from the 1980 federal census of population and housing. Except for the race and Spanish-origin numbers shown in Table 10, they are the final and official figures. They will be used for state and federal legislative reapportionment, state and federal revenue-sharing and any other project requiring official population or housing data. These data will also be used as the base for making population estimates and projections during the 1980s.

The population numbers shown here refer to permanent resident population only. According to the definition used by the U.S. Bureau of the Census, a person is "....counted as an inhabitant of his usual place of residence, which is generally construed to mean where he lives and sleeps most of the time. This residence is not necessarily the same as his legal residence, voting residence or domicile." Under this definition tourists and seasonal or parttime residents are excluded from the population count. Persons from foreign countries (except those representing foreign governments) are counted as residents regardless of their legal status if they are in the United States on a permanent basis. College students, military personnel and inmates of penal institutions are counted as residents of the places they live while institutionalized, not as residents of their "hometowns."

Florida grew very rapidly during the 1970s. While six Florida counties lost population between 1960 and 1970, none lost population between 1970 and 1980. All but five of Florida's sixty-seven counties grew by more than 11.4 percent, the decade growth rate for the United States as a whole. The distribution of Florida's population growth throughout the state was not uniform, however. The southern and central regions grew much more rapidly than the northern region. The three most rapidly growing counties were Citrus, Hernando and Pasco, all coastal counties immediately above the Tampa-St. Petersburg SMSA. Each of these counties grew by more than 150 percent. Also growing rapidly were Flagler and Martin counties on

the Atlantic coast; Collier, Charlotte and Lee counties on the lower Gulf coast; Seminole and Osceola counties in the central inland region; and Clay County near Jacksonville. Each of these counties grew by more than 95 percent. Clay was the only northern county to rank among the ten most rapidly growing counties in the state. The eight most slowly growing counties were all in the northern region: Gulf, Gadsden, Duval, Franklin, Madison, Hamilton, Jackson and Escambia. Each of these counties grew by less than 14 percent between 1970 and 1980. Figures 1 and 3 show graphically the growth rates of Florida counties during the past decade.

Variation in growth rates was even greater among municipalities than counties. While sixty-eight municipalities more than doubled in population between 1970 and 1980, another fifty-six experienced population declines. Taken together, municipalities grew by 27.8 percent during the past decade and unincorporated areas grew by 67.2 percent. Metropolitan areas grew by 41.6 percent and nonmetropolitan areas grew by 55.5 percent.

Table 1 of this booklet shows population and housing-unit counts for 1980 and 1970 for each municipality and county in Florida. Tables 2, 3, and 4 show population and decade population changes between 1940 and 1980 for counties, planning districts and SMSAs, respectively. Table 5 shows the rank by population size of the thirty-five largest cities in Florida in 1980, and their populations in 1970 and 1960. Table 6 shows the rank by population size of all sixty-seven counties in 1980 and their populations in 1970 and 1960. Table 7 shows the ranking of counties in 1980, 1970 and 1960 by land area and population per square mile.

There are only two components of population growth: natural increase and net migration. Natural increase is the difference between the number of births and number of deaths in a population. Net migration is the difference between the number of persons moving into a region and the number moving out. For Florida, net migration accounted for more than 90 percent of population growth between 1970 and 1980; natural increase accounted for less than 10 percent. Table 8 shows natural increase and net migration between 1970 and 1980 for the state and each

county. Table 9 breaks natural increase into its component parts, showing births and deaths by race between 1970 and 1980 for the state and each county.

Table 10 shows the April 1, 1980, population by race and Spanish origin for each county and the state. Whereas the other tables in this booklet are based on final census figures, the numbers for race and Spanish origin are provisional. Final counts will be determined after sample data from the census have been processed. It must be noted that racial characteristics of the Spanish population were coded differently in 1980 than 1970, making a comparison of whites, blacks and other races between 1970 and 1980 somewhat inaccurate.

Florida was one of the most rapidly growing states in the nation between 1970 and 1980. While the U.S. population grew by 11.4 percent, Florida's population grew by 43.4 percent. Only Nevada (63.1 percent) and Arizona (53.1 percent) grew more rapidly. Florida's absolute population increase of 2,948,574 was also third largest in the nation, trailing only California's 3,697,493 and Texas's 3,029,728. Florida was the only large state (greater than 3 million) to grow by more than 30 percent. Table 11 shows the population of the United States and each state for 1980 and 1970 and the percentage changes during the decade.

EXPLANATION OF TERMS

Population--number of persons on April 1, 1970 and April 1, 1980, as enumerated by the U.S. Bureau of the Census. Refers to permanent residents only, thus excluding tourists, seasonal and parttime residents. Includes aliens who have no other permanent residence.

Permanent residence--the place a person usually resides. This is generally construed to mean where a person eats and sleeps most of the time (i.e., more than any other place). This is not necessarily the same as legal or voting residence.

Housing units--a house, apartment, condominium, mobile home or group of rooms occupied as separate living quarters; or if vacant, intended for occupancy. Both occupied and unoccuppied units are included in this inventory. Includes units used by both permanent and nonpermanent residents.

Figure 1.—Absolute and percent change in population of Florida counties, April 1, 1970 to April 1, 1980

Note: Land-area figures represent the total area in the counties in 1970 and are not adjusted for lands which cannot be developed (government-owned parks or reserves) or are uninhabitable (swamps or marshes). County areas have been remeasured and the Census Bureau will release the 1980 figures next month. Some county areas may change slightly because of previous errors in measurement.

Errata Sheet

Florida Population: A Summary of 1980 Census Results

Prepared by: Population Program
Bureau of Economic and Business Research
University of Florida

Because of adjustments made by the U.S. Census Bureau to 1970 Census figures, several changes should be made in the 1970 numbers published in Table 1. All 1980 figures and county figures are correct.

Add footnotes

Page 7 Bay County*

*1970 population includes 3 places which were incorporated in 1970 but are now a part of Panama City Beach:

Edgewater Gulf Beach	84
Long Beach Resort	167
West Panama City Beach	1,052

Page 17 Monroe County*

*1970 population includes 2 persons for Munson Island, which was incorporated in 1970 and is now unincorporated.
